

Chemistry 11

Writing Chemical Formulas – Non Metal / Non Metal

Directions: Write the formula for each of the following compounds. Have fun 😊

1. difluorine dioxide _____
2. silicon tetrafluoride _____
3. xenon trichloride _____
4. Pentasulphur octanitride _____
5. Dinitrogen pentoxide _____
6. carbon pentabromide _____
7. xenon tetraoxide _____
8. triphosphorus heptoxide _____
9. carbon dioxide _____
10. silicon trifluorine _____
11. trinitrogen tetrabromide _____
12. nitrogen monoxide _____
13. silicon pentnitride _____
14. tricarbon hexafluoride _____
15. phosphorus hexoxide _____
16. sulphur pentabromide _____
17. carbon heptachloride _____
18. sulphur octoxide _____
19. xenon tribromide _____
20. diphosphorus tetroxide _____
21. nitrogen tetraiodide _____
22. oxygen difluoride _____
23. tricarbon pentachloride _____
24. silicon heptabromide _____
