

Animation

Media 9

What is Animation?

- Animation is the process of creating moving pieces of artwork.
- That is taking 2D images and creating subtle changes to create movement.

Why is animation important?

- Animation is important as it provides another medium in media that can be used to convey a message.

When is animation useful?

- Anytime a person is using media an animation can be used to get the audiences attention.
- Animations are also useful when a single 2D image does not represent something
 - For example, if a picture shows a person with their hand in the air, that does not show that they are actually waving their hand as it is only a single image.

Animations in PPT

- Animations in PPT are quite simple, but this is our starting point.

Animations in PPT:

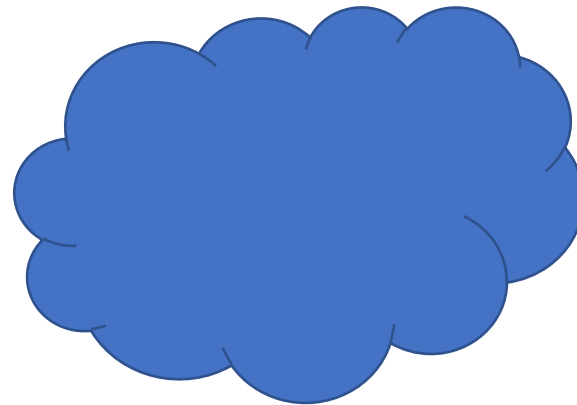

Create a PPT then follow the steps

- Step one choose a shape

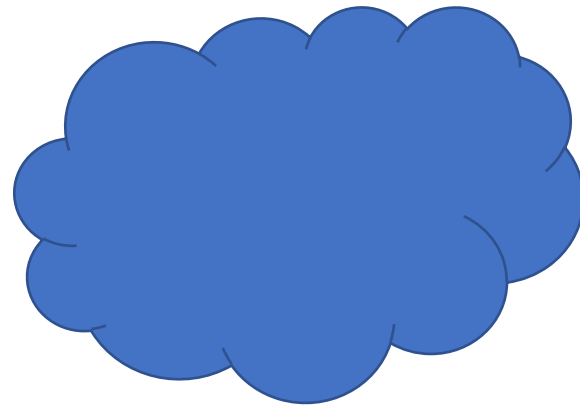

Animations in PPT

- Step two choose another shape

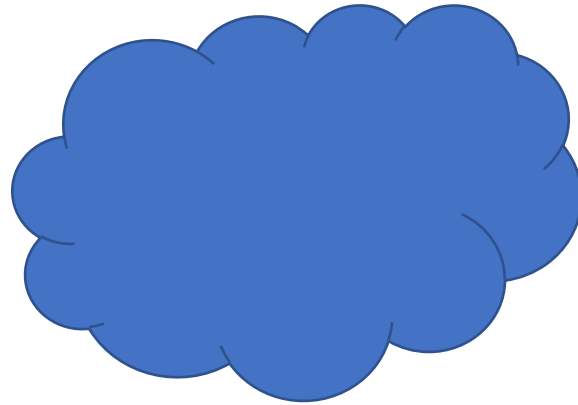

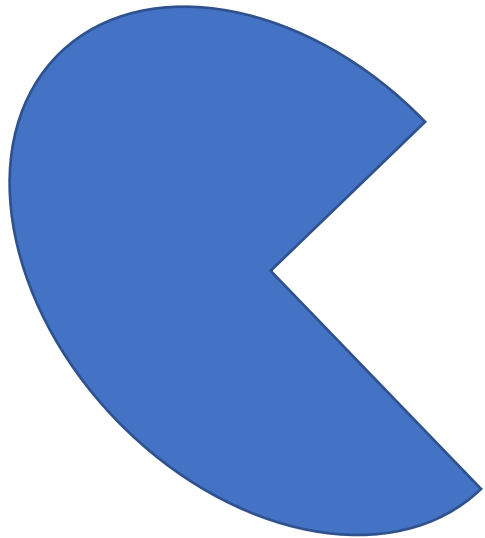

Animations in PPT

- Step three open animations from the ribbon

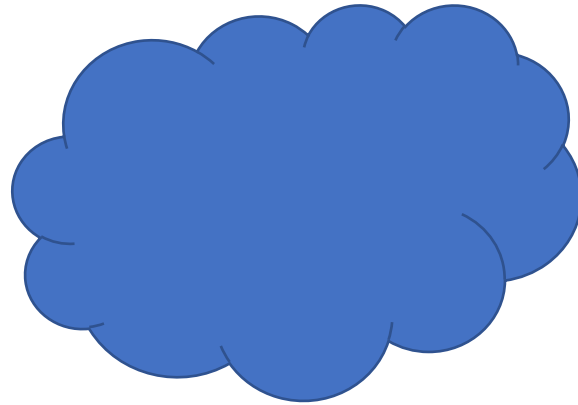

Animations in PPT

- Step four create an entrance effect for both shapes

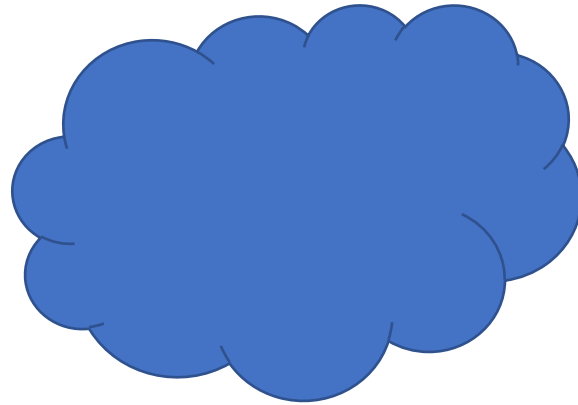

Animations in PPT

- Step five create an emphasis effect for both shapes

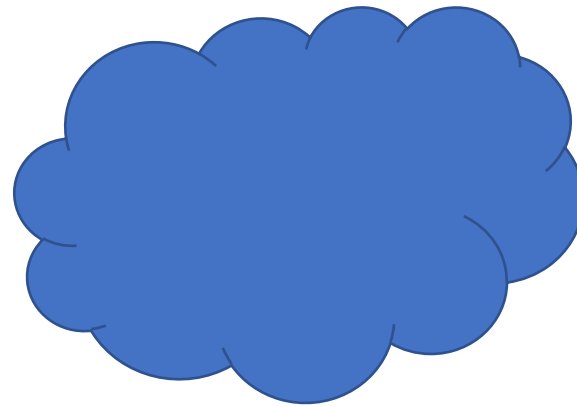

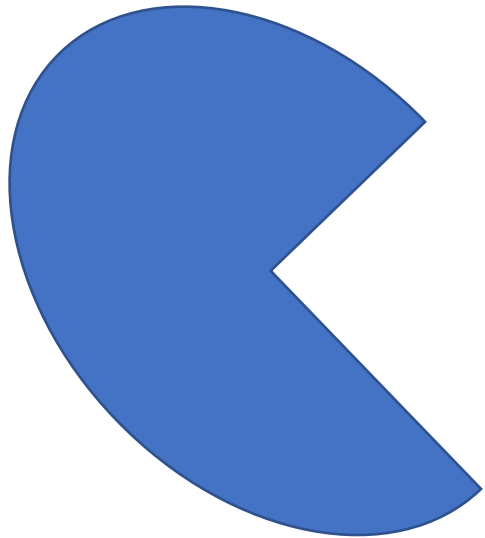

Animations in PPT

- Step six create a path animation for both shapes

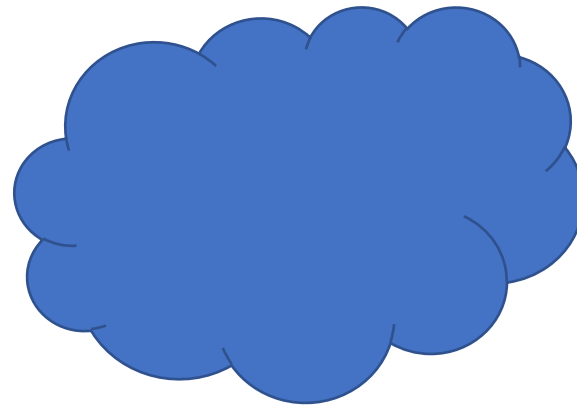

Animations in PPT

- Step seven create an exit effect for both shapes

Animations in PPT

- Step eight call me over to mark your animation

Animations in PPT

- Step 9 create a unique animation of your own and show it to me for marks

Stygz

- Stygz is an animation program which uses stick figures to create a moving comic strip
- I will run through an example with you
- Expectations
 - You will create two Stygz animations
 - Criteria
 - One will only have 1 stick figure the second must have 2 or more
 - Both must have a minimum of 200 scenes
 - At the end you must show me both animations for a total of _____ marks
 - Please use the rubric for guidance
