Simplify to the Lowest Terms

$$1) \quad \frac{7}{12} + \frac{10}{12} + \frac{9}{12} = \frac{7}{12} + \frac{10}{12} + \frac{9}{12} = \frac{26}{12} = \frac{13}{6} = 2 \frac{1}{6}$$

$$2) \quad \frac{6}{8} + \frac{4}{8} + \frac{5}{8} = \frac{6}{8} + \frac{4}{8} + \frac{5}{8} = \frac{15}{8} = 1 \frac{7}{8}$$

$$3) \quad \frac{5}{7} + \frac{1}{7} + \frac{6}{7} = \frac{5}{7} + \frac{1}{7} + \frac{6}{7} = \frac{12}{7} = 1 \frac{5}{7}$$

$$4) \quad \frac{8}{9} + \frac{6}{9} + \frac{4}{9} = \frac{8}{9} + \frac{6}{9} + \frac{4}{9} = \frac{18}{9} = \frac{2}{1} = 2$$

$$5) \quad \frac{2}{9} + \frac{7}{9} + \frac{3}{9} = \frac{2}{9} + \frac{7}{9} + \frac{3}{9} = \frac{12}{9} = \frac{4}{3} = 1 \frac{1}{3}$$

$$6) \quad \frac{3}{7} + \frac{2}{7} + \frac{5}{7} = \frac{3}{7} + \frac{2}{7} + \frac{5}{7} = \frac{10}{7} = 1 \frac{3}{7}$$

$$7) \quad \frac{2}{5} + \frac{1}{5} + \frac{4}{5} = \frac{2}{5} + \frac{1}{5} + \frac{4}{5} = \frac{7}{5} = 1 \frac{2}{5}$$

$$8) \quad \frac{5}{7} + \frac{6}{7} + \frac{3}{7} = \frac{5}{7} + \frac{6}{7} + \frac{3}{7} = \frac{14}{7} = \frac{2}{1} = 2$$

$$9) \quad \frac{1}{9} + \frac{5}{9} + \frac{4}{9} = \frac{1}{9} + \frac{5}{9} + \frac{4}{9} = \frac{10}{9} = 1 \frac{1}{9}$$

$$10) \quad \frac{5}{9} + \frac{4}{9} + \frac{1}{9} = \frac{5}{9} + \frac{4}{9} + \frac{1}{9} = \frac{10}{9} = 1 \frac{1}{9}$$
