The image shows a screenshot of a web application interface for generating word clouds. It features a text input field with a light blue border and a white background. The input field contains a single vertical bar character (|). Above the input field, there is a header bar with the text "Paste/Type text" and a close button (X). Below the input field, there are two buttons: "Cancel" and "Apply". The "Apply" button is highlighted in blue. The entire interface is enclosed in a dark grey border.

 4. Here is an example paragraph

Paste/Type text

Paste or type your text to convert it into a word cloud.

Media is very important to every person as it is far more than understanding computers, but rather an understanding of how the world works. Including, how advertisements and entertainment are directed at a specific group of individuals to help sell merchandise. The goal is to learn how to decide for oneself. |

Word Cloud Generators

- Final Steps
 - i. At this point you can modify your cloud to make it more your style
 - ii. Follow the instructions in the box shown below

We've generated a wordcloud based on the text you've just provided. Next steps:

- Change the shape (click *Shape*), colors (click *Theme* or *Colors*) and font (click *Font*) of the wordcloud.
- If the cloud seems small, or you just see a circle, move the big slider to the right to make the wordcloud bigger.
- If you see a message *X words not drawn*, you can move the big slider to the left to make the words in the wordclouds smaller, so that more words fit inside the shape.
- Are you happy with the end result? Save your wordcloud via the File menu (click *File*).

Here is my final version in many different formats

Here is my final version in many different formats

Here is my final version in many different formats

It is your turn now

- Please generate 3 word clouds using different text for each one
 - For your first one keep it simple
 - The second change a few things
 - On the third change all the setting and generate something unique
- Must show me all 3 for a mark!!!

ADDING GAMES AND INTERACTIVE CONTENT TO WEBSITES

Adding Games in HTML

- https://www.w3schools.com/graphics/game_intro.asp
- Run through the tutorial on the website mentioned above
- Also, make sure you are making your game unique so that it stands out from your peers.
- The goal is to make a game that will encourage viewers to come back to your website
