CPU 10 to 12   Temperature and Precipitation Assignment Criteria

Temperature and Precipitation Graphs using Excel

Assignment Criteria
- Select 3 different cities
  o For each city find the temperatures and precipitation levels online
  o Using excel place the data into the spread sheet
  o Use the data to create a graph
  o Explain your sources of error
  o Site the source (that is the URL where you obtained your information)
- The assignment is out of 12 marks
  o Division of marks per city (each city is worth 4 marks therefore 3 cities x 4 marks = 12 marks total)
    ▪ 1 mark for the data (accuracy counts)
    ▪ 1 mark for the graph(s) (must be labeled accurately, capital letters for months, series labeled as temperature and precipitation, the correct type of graph for the data)
    ▪ 1 mark for source(s) or error (the sources of error must make sense)
    ▪ 1 mark for the source (does the link lead to an actual site)
