Word Cloud Generators

- Steps involved

  4. Here is an example paragraph

Paste/Type text   ×

Paste or type your text to convert it into a word cloud.

Media is very important to every person as it is far more than understanding computers, but rather an understanding of how the world works. Including, how advertisements and entertainment are directed at a specific group of individuals to help sell merchandise. The goal is to learn how to decide for oneself. |

Word Cloud Generators

- Steps involved
  5. Make sure you edit your paragraph using word, as this program does not have spell check
     - To edit in Word copy or cut the paragraph and place it in Word
     - Spell check in Word
     - Then paste the paragraph back into the Word Cloud Generator

Word Cloud Generators

- Steps involved

  6. Click Apply once you are happy with your paragraph

Word Cloud Generators

- Final Steps
  i. At this point you can modify your cloud to make it more your style
  ii. Follow the instructions in the box shown below

We've generated a wordcloud based on the text you've just provided. Next steps:

- Change the shape (click *Shape*), colors (click *Theme* or *Colors*) and font (click *Font*) of the wordcloud.
- If the cloud seems small, or you just see a circle, move the big slider to the right to make the wordcloud bigger.
- If you see a message *X words not drawn*, you can move the big slider to the left to make the words in the wordclouds smaller, so that more words fit inside the shape.
- Are you happy with the end result? Save your wordcloud via the File menu (click *File*).
Word Cloud Generators

- Final Steps continued
  i.   Screen shot your word clouds by pressing COMMAND/WINDOWS KEY + SHIFT + 4
  ii. Your cursor will change. At this point highlight what you want to save.
  iii. Once you have all your images, open a PPT and paste all your images into it
  iv. Save the PPT, and drop box you assignment digitally
   - Your assignment needs your name and the name of the assignment.

Here is my final version in many different formats

It is your turn now

- Please generate 5 word clouds using different text for each one
  - For your first one keep is simple
  - The second and third change a few things
  - On the fourth and fifth change all the settings and generate something unique

- Must show me all 5 for a mark!!!
